

Intellihot

Grand Hyatt Vail turns to Intellihot.

Due for repairs, the Grand Hyatt Vail turns to Intellihot for tankless water heating reliability, cost savings, and cutting OPEX.

Industry

Hospitality

Property Details

285 Rooms

Product Installed

Three iQ1501s

Installed Capacity

4,500,00 BTU/hr
Zero Gallons storage

Installation Date

November 2019

Grand Hyatt Vail Vail, CO

Nestled at the base of Vail Mountain, along the banks of Gore Creek, Grand Hyatt Vail is located in the heart of Vail Valley within the Cascade Village neighborhood. The hotel features bold, vibrant architecture inspired by its scenic locale and welcoming service, with exclusive amenities ideal for both leisure travelers and conference attendees alike.

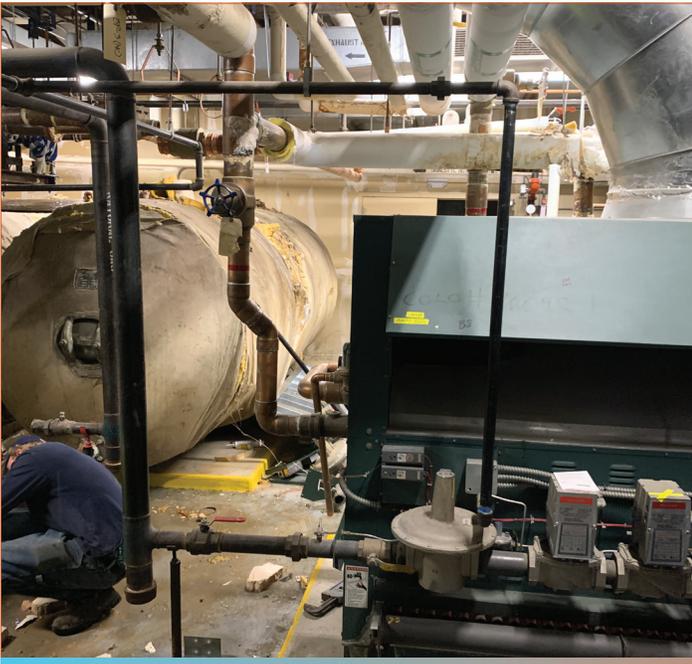

Remote access to the Intellihot units is a game-changer. The units' sleek design creates significant newfound space within our central plant.

Dan Johnson,
Grand Hyatt Vail General Manager

From the day the Intellihot units were on the truck heading to Colorado, PSI received all the support we could possibly ask for. Installation went remarkably smooth. The availability of factory reps as well as factory engineers was great. We received drawings, had all of our questions answered promptly and with great detail. PSI will continue using the Intellihot product.

Brandon Content,
Installing Contractor, Plumbing Systems Inc.

Before

The existing system was significantly less efficient. Two of the three tanks were due for repairs, and aging boilers required regular maintenance.

The Intellihot Solution

Grand Hyatt Vail needed a solution that would be implemented quickly, plus handle the hotel's demand for many years to come. Grand Hyatt Vail saved on costs upfront plus installation costs.

Endless water, Zero waste

Our systems are smart; from the moment they start running, they begin to learn typical usage patterns. They adapt, heating up the amount of water you need: no more; no less. While traditional boilers run 24/7/365 waiting to be used, Intellihot systems heat water on demand and keep it flowing when and where people need it. Our process conserves up to 40% of the energy lost in traditional water heating methods. No more waiting, no more wasting.

Less is more

Intellihot saves money, time and space from installation to operation. Our technology gets up and running quickly and costs less to operate month after month. With all the power of alternative systems at a fraction of the size, our design makes space-hogging boilers and storage tanks totally obsolete.

Too smart to fail

What we make performs to nearly impossible standards. As robust as diesel engines, Intellihot systems are built for decades of like-new operation. Reliability is designed into every inch, from maintenance-free heat exchangers to systems that deliver industrial water capacities without risk of single-point failure. The best part? Built in redundancy and no master controller with our patented masterless cascading technology.

Change Made Effortless

Technology should adapt to people, not the other way around. Our systems are simple to install, use and maintain - for our customers and our customers' customers. Even as our innovations operate out of sight, every aspect is crafted to be enjoyable, intuitive and surprisingly smart.
