

EFFICIENT, HEALTHY, AND SUSTAINABLE WATER HEATING SOLUTIONS

2024 PRODUCT GUIDE

Every Building Can Run On Intellihot

Powered by Intellihot.

Intellihot is at home wherever people live, work or play. From wall-hung units that help restaurants, hotels and other businesses cut their energy bills to floor units robust enough for hotels, high-rises, schools, stadiums, apartment buildings and hospitals – **we're committed to progress and helping to improve the way people live.**

We're setting the benchmark for superior performance and efficiency. From the moment they start running, Intellihot water heating units begin to learn your facility's typical usage patterns. Then they adapt, heating up the amount of water you need – no more, no less – improving your facility's energy efficiency by up to 40%.

We are building a waste-free future – without a drop of sacrifice.

We call that progress.

Our journey to create a better heating system began back in the winter of 2005, when a tank-type water heater broke down and flooded my basement. By combining the principles of a diesel engine's robustness, robotics intelligence, and marine environment durability, we set out to design a unit from the ground up – one that would outperform and outlast all others. Quickly, our goal grew from not just making a better water heater but creating an efficient and intelligent water heating and delivery system.

Innovation is our hallmark and simplicity, efficiency, and durability are at the core of every Intellihot product. Our water heaters utilize the best attributes of tank and tankless – with intelligent logic and integrated recirculation. The result is a water heating system capable of handling the extreme loads of commercial applications with the preciseness needed for residential applications.

Our products are proudly engineered and built in Galesburg, Illinois making Intellihot the first and only US-based manufacturer of gas-fired condensing tankless water heating systems. Over the past eight years, Intellihot has helped commercial customers throughout the nation save thousands of dollars while eliminating downtime. As we continue to expand our coverage across North America, we strive to provide you with the same unmatched performance advantages and savings. Our talented team of dedicated professionals is ready to assist you and help your business succeed.

I thank you for considering our Intellihot products.

Sincerely,
Sridhar Deivasigamani
President, Intellihot Inc.

Sridhar Deivasigamani

Wall Hung Units

TECHNOLOGY OVERVIEW

Intellihot's wall hung units pack a powerful punch in a compact form. Ideal for highly variable applications, our wall hung units sport a robust build. Masterless cascading lets you get creative with small spaces reliably.

KEY FEATURES

- ♦ **Revolutionary Heat Exchanger** – Features our revolutionary 316L stainless steel heat exchanger that can withstand all thermal shocks and stresses, and provides superior corrosion and erosion resistance.
- ♦ **Masterless Cascading** – Cascade up to 10 units together and eliminate single-point failures with our patented Masterless Cascading technology.
- ♦ **Efficient Burner** – Features a radially fired, downward-blowing, premixed burner with a negative pressure gas valve and plenum design.
- ♦ **Self-Descaling** – Patented self-descaling design prevents lime-scale buildup.
- ♦ **Eliminate Mixing Valves & Lower Legionella Risks** – With no storage tanks, there's a lower risk for Legionella growth. By eliminating the need for mixing valves, this feature also reduces their associated unreliability and costs.
- ♦ **Multiple Venting Configurations** – Include concentric, snorkeling terminations in different pressure zones and single-pipe vent, with smart common venting.
- ♦ **Numerous Levels of Built-in Safety Features** – Prevent flue from back drafting, including fan speed control.
- ♦ **Wi-Fi & 3G/4G Connectivity** – Real-time monitoring of your Gen II unit is available through the unit's 3.5" touch-screen – and accessible remotely via a mobile app. Each unit can be easily connected to your building's Wi-Fi router or to Intellihot's internet hub.
- ♦ **Masterless Cascading** – Eliminate single-point failures with our patented Masterless Cascading technology. If one cascaded unit is offline for servicing, all other units regroup and continue to operate. Cascade up to 10 units (2,510,000 BTUs/hour) for larger applications.
- ♦ **Full Modulation** – Smart units deliver maximum BTU/hr input when needed and zero BTU/hr the rest of the time.
- ♦ **Gas-Fired** – By using natural gas our systems lower operating costs and improve ROI vs. electric water heaters. 73KW of heating capacity available with low pressure drop; capable of 9.6 GPM at 50F temperature rise.
- ♦ **Common Venting Capabilities** – The iQ251 and iQ251D units transform common venting into smart–common venting.
- ♦ **ASME-HLW Compliant** – Suitable for applications managed by engineers, specifiers and contractors. (iQ251, iQ251D)

Floor Standing Units

TECHNOLOGY OVERVIEW

Drop-in ready, the Neuron Series packs the energy-saving benefits of tankless units in a reliable design that installs quickly. With the same connections as a traditional boiler for quick startups, and no tank to maintain, the Neuron Series drops in like a breeze.

KEY FEATURES

- ♦ **Drop-In Ready Replacement** - Neuron Series units feature similarly located water in and out connections for easy hook-up without the need to re-pipe. Replace typical tank units in a flash.
- ♦ **Masterless Cascading With Common Venting** - Up to 4 units can be cascaded with common venting for an output of 799,800 - 1,999,996 BTUs/hr.
- ♦ **Quick Ship** - Readily available stock, ships quickly with short lead times on orders.
- ♦ **Gas Pressure Sensor** - Easy ignition troubleshooting.
- ♦ **Water Pressure Sensor** - Allows for scaling checks.
- ♦ **Direct Cellular Connectivity** - Remotely access and monitor our Neuron units via the LTE cell connectivity feature. No need for your building's Wi-Fi.
- ♦ **Control Board OTA** - Over The Air monitoring with software backup and updates.
- ♦ **Automatic Pump Control** - Runs only with flow to the unit preventing pump burnout.
- ♦ **Lightweight** - The slim, lightweight design makes light work of transporting and installation.
- ♦ **ASME Certified** - iN199A, iN401, iN501
- ♦ **Built-In Redundancy** - iN401/iN501 Neuron models come with two separate, independently controlled heat engines; thus eliminating additional expense and space for a redundant backup water heater.
- ♦ **Mobile App, telliCare®** - Use Intellihot's mobile app and start monitoring your unit. Check water inlet/outlet temperatures, flow rates, flue gas temperatures and life of key parts, available on your mobile device of choice.
- ♦ **Low Gas Pressure Operation** - System operates on low gas pressure, down to 2.5" WC, without reduction of capacity.
- ♦ **Eliminate Mixing Valves & Lower Legionella Risks** - With no storage tanks, there's a lower risk for Legionella growth. By eliminating the need for mixing valves, this feature also reduces their associated unreliability and costs.
- ♦ **Flexible-Floating Heat Exchanger Design** - stress-relieving and thermal shock resistant.
- ♦ **7" Color Touch Screen** - access to usage data, troubleshooting, and parts wear.

iQ Series, Gen II

iQ751 | iQ1001 | iQ1501

Floor Standing Units

TECHNOLOGY OVERVIEW

With enormous outputs - up to 3 million BTUs/hr, the iQ floor standing units are ideal for large commercial applications. Housing multiple self-operating heat exchangers in a compact build, the units offer revolutionary redundancy. An industry-leading turndown ratios (up to 100:1) reduces gas bills by up to 40% for zero compromise between space, efficiency, and performance.

KEY FEATURES

- ♦ **High Capacity in a Compact Size** – At 730 - 1645 lbs. and 30" width (fits elevator doors), iQ floor standing units supply 20 - 80 GPM at 70°F temperature rise non-stop.
- ♦ **Masterless Cascading** – Combine multiple units without a master controller for higher demands, or additional redundancy.
- ♦ **Wi-Fi and 3G/4G Connectivity** – Real-time monitoring of your Gen II unit is available through the unit's 7" touch-screen – and accessible remotely via a mobile app. Each unit can be easily connected to your building's Wi-Fi router or to Intellihot's internet hub.
- ♦ **Eliminate Mixing Valves & Lower Legionella Risks** – With no storage tanks, there's a lower risk for Legionella growth. By eliminating the need for mixing valves, this feature also reduces their associated unreliability and costs.
- ♦ **Competitive Turndown Ratio** – Unparalleled gas savings with an industry leading turndown ratio, 100:1 for iQ3001, 66:1 for iQ2001, 50:1 for iQ1501, 33:1 for iQ1001, and 25:1 for iQ751.
- ♦ **Common Venting Capabilities** – The iQ floor units transform common venting into smart-common venting.
- ♦ **ASME-HLW Compliant** – Suitable for applications managed by engineers, specifiers and contractors.
- ♦ **Guaranteed** – Backed by a 10 year non-prorated heat exchanger warranty.

telliSize is an app specially designed for contractors and service providers to provide quick size and quotations for water heater related requirements of your clients' projects. By entering simple measurements and the number of units in your target site, you can get the exact water heater requirements within minutes. This includes an email with detailed schematics.

Electron Series

iE1 | STD MID MAX Models

Floor Standing Units

TECHNOLOGY OVERVIEW

Intellihot offers a unique electric heat pump water heating system that is healthy and sustainable. Our Electron series is the world's first electric tankless heat pump water heater that heats water on-demand by using energy stored in a thermal battery. It produces clean, healthy, and efficient hot water without storage while providing the utmost reliability. No compromise between health or efficiency unlike others.

KEY FEATURES

- ♦ **Ideal for high-pressure, multi-storey buildings.**
- ♦ **Handles tough hard-water scaling.**
- ♦ **Produces hot water up to 170°F.**
- ♦ **Worry Free** - 24/7 factory monitoring via cellular connectivity.
- ♦ **Automatic software updates over the air.**
- ♦ **Grid-enabled via CTA-2045.**
- ♦ **Seamlessly cascade using Bluetooth, up to 6 units, no wires.**
- ♦ **CO2 Refrigerant** - Lowest impact on the environment with a Global Warming Potential (GWP) of 1, zero Ozone Depleting Potential (ODP), and better cold weather performance.
- ♦ **On-Demand & Tankless** - Absorbs & stores energy from the air in a specially-designed thermal battery. This energy is used to heat water on-demand without any storage, thereby mitigating Legionella risks.
- ♦ **Free Up Space** – Can be installed outdoors or indoors.
- ♦ **Solar-ready and can be upgraded in minutes.**
- ♦ **Lightweight & Compact** – 30% smaller
- ♦ **Intelligent Leak Sensor** – Multi-fluid detection
- ♦ **Innovative Built-In Glycol Concentration Sensor (GCS)**

Intellihot

Legionator Series

iL3.5 | iL6.0

Point of Use Units (Heat & Disinfect)

TECHNOLOGY OVERVIEW

The Legionator heats and disinfects water simultaneously. A set of high-quality quartz tubes heats water to comfortable temperature. As the water is exiting the unit, ozone is injected into the water. This has two effects – (1) it disinfects the water (2) This ozone is also carried in the water to the faucets and mitigates the bacteria present within the faucet valve seats and aerators.

KEY FEATURES

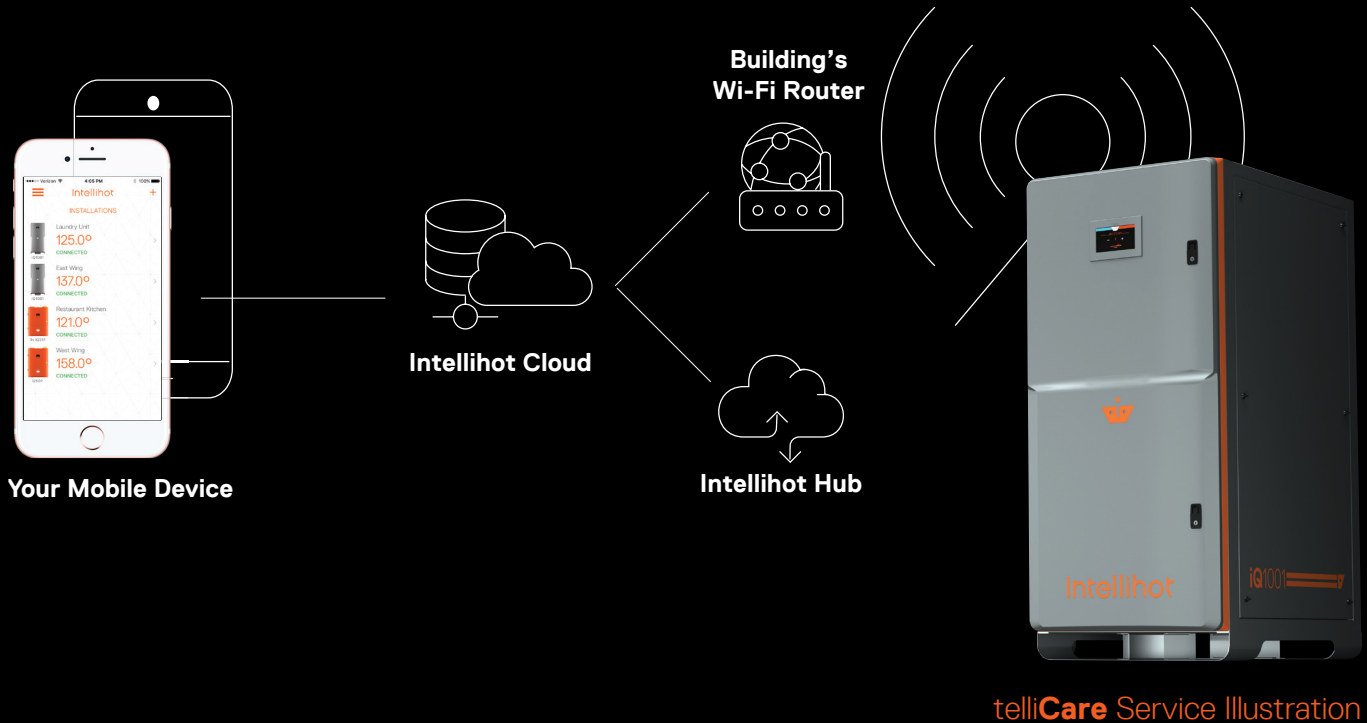

- ♦ **Automatic Ozonation Technology** - Mitigates pathogens in water and automatic faucets.
- ♦ **Scale Resistant** - Infrared heating quartz tubes heat water using infrared, mitigating scale formation.
- ♦ **Efficient and Healthy** - With no storage, the unit delivers endless hot water on-demand saving energy and producing healthy water.
- ♦ **Space Saving** - Eliminate water storage tanks to save space with a tankless unit. Install under a sink or in a nearby closet.

telliCare Service

Zero Downtime. Zero Worries. Zero Problems.™

TECHNOLOGY OVERVIEW

Real-time Remote Access Made Easy. telliCare is our innovative Wi-Fi/LTE enabled, prognostics and predictive maintenance service for Intellihot's Gen II iQ and iN tankless water heaters. This service allows your Intellihot water heaters to be monitored and controlled via an app on your mobile device, so that you have control on the go. Whether you are on-site or remote, your telliCare plan provides you with valuable benefits and data at your fingertips.

- ♦ 24/7/365 Monitoring by factory personnel who can take appropriate action remotely, if needed.
- ♦ Notifications sent with the right information, to the right people at the right time.
- ♦ Automatic Firmware Updates published to units.
- ♦ Prognostics and Predictive Analytics reports available on your mobile device.
- ♦ BTUs, Firing Rate, and Flue Gases monitored on a daily, weekly, and monthly basis.
- ♦ Inlet/Outlet Temperatures Monitored on an hourly, daily, weekly, and monthly basis.
- ♦ Flow Rates monitored on an hourly, daily, weekly, and monthly basis.

Emissions & Certifications

Summary & Table

EMISSIONS SUMMARY 2023

Every Intellihot unit in operation contributes to our collective decarbonization goal. Endless Progress is a joint mission.

12.3 BILLION POUNDS OF CO₂

emissions saved as of this year by Intellihot's products & services.

1.05 BILLION THERMS OF ENERGY

saved from Intellihot products & services.

1.24M GAS VEHICLES

Our 2022 CO₂ savings are equivalent to the amount of CO₂ emissions generated by 1,241,538 gas vehicles driven for a year.

6.7M ACRES OF FORESTS

Our 2022 CO₂ savings are equivalent to the amount of CO₂ sequestered by 6.7 million acres of American forests.

628M GALLONS OF GAS

You would need to burn 627.8 million gallons of gasoline to generate the amount of CO₂ emissions that we saved in 2022.

1.1M HOMES' ELECTRICITY

1,085,568 American homes generate the amount of CO₂ emissions we saved in a single year with their electricity usage.
